

## SAMPLE CONDITIONING SYSTEMS, SAMPLE RECOVERY SYSTEMS, CHILLERS & SHELTERS

### INTEGRATED SYSTEMS

The key to any successful analytical installation is the design and manufacture of the sample transport and conditioning system, and operating the analyser in a properly controlled environment.

ATAC is qualified to optimise your installation with proven designs for probes, fast-loop systems, sample conditioning systems, sample recovery systems and analyser cubicles and shelters.

Such systems range from simple panel mounted units to complete turnkey packages. Our systems are designed with the user in mind – to meet the client's individual needs with regard to health and safety, ambient considerations and local electrical codes and standards.

### COMPONENTS

ATAC designs and manufacturers a range of engineering components for many of the analytical systems supplied.

Analytical Technology & Control Limited  
Broadway, Market Lavington, Devizes,  
Wiltshire SN10 5RQ England.
